

SYSTEM AND METHOD FOR REMOTE CONTROL AND MANAGEMENT OF WIRELESS DEVICES

ABSTRACT

A method, system, and computer program product that provides the capability to manage, control, and reconfigure wireless devices remotely over a wireless network with acceptable reliability and security. A method for remotely managing a wireless device over a telecommunications network comprising a
5 server and the wireless device, the method comprises the steps of establishing a communicative connection between the server and the wireless device over a signaling channel of the telecommunications network, transmitting a command from the server to the wireless device over the signaling network, and executing the command at the wireless device.
